Eisai Co., Ltd.

## **Eisai's Corporate Pension Fund Announces Adoption of "Asset Owner Principles"**

The Eisai Corporate Pension Fund, which manages Eisai's corporate pension, has announced its support and adoption of the "Asset Owner Principles," a set of common principles related to the management, governance, and risk management as an asset owner (institutional investor as an asset holder).

"Asset Owner Principles" are part of a series of initiatives under the Japanese government's plan to establish the country as a leading asset management nation. Issued by the Cabinet Secretariat in August 2024, asset owners, including corporate pension funds, are expected to adopt these principles.

Eisai expects the Eisai Corporate Pension Fund, as an asset owner, to not only enhance the management of pension assets in accordance with this principle but also contribute to the sustainable growth of businesses they invest in and economy as a whole.
